About me

Experienced software engineer with a demonstrated history of working in worldwide impact projects and products.

I'm always looking for new challenges and trying to use cutting edge technologies to solve real world problems. In the last years, I have been focused on frontend development, specially in ReactJS ecosystem.

Currently, I am working in a Spanish consultancy company called Nomasystems S.L.. We develop projects and high quality software products for other worldwide scale companies.

I also like to work in my personal open source projects in my spare time, all of them are available on my [GitHub](#) and in my [Personal Portfolio](#).

Experience

Software Engineer

Jul 2018 - Present

[Nomasystems S.L.](#)
